October 2026

Experience

Research Associate in Health Economics
Manchester, UK

Manchester Centre for Health Economics, University of Manchester — Oct 2024 - Present

- Conducted a trial-based economic evaluation for **EQUITy WP4**
- Led regression-based analyses on large-scale rheumatology registry data (**Rheum4U**)
- Executed all analyses and wrote the manuscript; published as first author (**EYEGEN**)
- Provided technical guidance and **informal R training** to academic colleagues
- Chaired meetings and supervised research interns, including conducting interviews
- **Accredited Researcher (ONS, 2025–2030):** authorised to access secure microdata under the Digital Economy Act 2017

Honorary Researcher
Manchester, UK

Manchester University NHS Foundation Trust — Nov 2024 - Present

- NHS governance credential enabling collection of primary care genetic testing data in collaboration with clinicians and geneticists (**EYEGEN**)

Research Assistant
Manchester, UK

Economics Department, University of Manchester — Aug 2023

- Implemented support vector machines in Python to predict poverty lines; covered data preprocessing, feature engineering, model training, and evaluation.

Education

University of Manchester
Manchester, UK

MSc in Economics — Sep 2023 - Aug 2024

- Grade: **Distinction**
- **Dissertation:** Differences-in-Differences with a Continuous Treatment: New Evidence and Applications
- **Key Modules:** Econometric Theory, Microeconometrics, Health Economics

University of Manchester
Manchester, UK

BA in Economics — Sep 2020 - Jul 2023

- Grade: **First Class**
- **Key Modules:** Econometrics and Data Science, Quantitative Methods, Microeconomics

Teaching

Teaching Assistant
Manchester, UK

POPH60092 Economic Evaluation in Healthcare, University of Manchester — 2024–2026

- Supported postgraduate teaching in cost-effectiveness analysis and health technology assessment methods
- Responsibilities included facilitating discussion boards and contributing to assessment preparation

Skills

Statistical Methods	Cost-effectiveness analysis, Multistate models, Panel econometrics, Network meta-analysis, Difference-in-differences
Languages	**R**, **Stata**, Python, Matlab, C++
Tools	**R: tidyverse**, Quarto, Git, Excel

Research in Progress

- **EYEGENE:** Cost effectiveness of a hypothetical RPGR-XLRP gene therapy.
- **EQUITy:** Health economic analysis of a cluster randomised trial of a mental health training intervention.
- **Rheum4U:** A longitudinal study of the presenteeism–health status relationship in a rheumatoid arthritis disease registry.
- **IMATCH:** A scoping review of benefit measures for increasing the output of clinical trials.
- **Breast Cancer:** A NMA of medicines that reduce breast cancer risk.
- **Pharmacy First:** An Economic evaluation of the Pharmacy First programme.

Outside of work

I enjoy time with family and friends, good coffee, food, cooking, music, and movies, as well as the outdoors and travelling.
